Big Ben

Mobile / Blockchain / Full-stack developer

Lagos, Nigeria github.com/Big-BenW3 x.com/banditdotsol

PROFILE

Developer who ships mobile apps, onchain products and the full-stack systems behind them. I build with Flutter and React Native, write Solana programs in Rust and Solidity contracts, and run production backends on PostgreSQL and Redis. I care about products that feel smooth to use, scale cleanly and are simple enough to trust.

SKILLS

Languages	TypeScript, JavaScript, Python, Dart, Rust, Solidity, HTML, CSS
Mobile	Flutter, React Native, Expo, Solana Mobile Wallet Adapter
Web and APIs	React, Next.js, Node.js, Express, Hono, Bun, FastAPI
Onchain	Solana and Anchor, EVM contracts, Sui and Walrus, wallet and payment flows
Data and tools	PostgreSQL, Redis, Drizzle, Supabase, Git

SELECTED PROJECTS

Avera Next.js, Hono, PostgreSQL, Redis
Collaboration platform: public ideas, spaces with roles and invites, roadmaps and tasks, with realtime and calls.

Perma.link Flutter, Sui, Walrus, Supabase
Short links for files on Walrus decentralized storage, paid from the user's own Sui wallet.

Docsmith Python, Flask, MkDocs
Turns a GitHub SDK repo into a complete docs site by reading the source and parsing the AST.

FundFlow FastAPI, Next.js, Kora
Fundraising with an immutable ledger and payouts released only when milestones are met.

Lenear Next.js, TypeScript, Drizzle, Neon
AI code review in the terminal: reads your git diff, flags bugs and security risks, scores the result.

Wella Next.js, PostgreSQL, Drizzle
Welfare complaints as an accountable queue: anonymous voting, status updates, role-gated admin.

C-Brain Next.js, React Flow
Local-first second brain on an infinite canvas with Markdown notes and linked ideas.

SVGdio Next.js, TypeScript
Layer-based SVG and CSS studio with a keyframe timeline and clean exports.

Sia Mobile Expo, React Native, Zustand
Student itinerary app for students and course reps: posts, calendar, resources, AI-assisted planning.
